

CSE 427
Class Test 3
Time – 15 minutes

Section 1
Student ID:

In the following neural network find the updated weights of W_{24} and W_{47} . Initially the weights of all the links are 1.0 and the biases of node 3, 4 and 5 are -0.5 each. Assume the biases of node 6 and 7 are -4.0 and -3.75 respectively. Assume that the input is $X_1 = 1$ and $X_2 = 1$ and the target output is $Y_6 = 0$ and $Y_7 = 1$. The learning rate is 0.1 and all the nodes are using Relu activation function

-------	-----	-------------

Question 1:

In the following neural network **find** the updated weights of $\mathbf{W}_{25}$ and $\mathbf{W}_{58}$. Initially the weights of all the links are 1.5 and the biases of node 3, 4, 5 and 6 are -1 each. Assume the biases of node 7 and 8 are -3.0 and -2.5 respectively. Assume that the input is $X_1 = 1.5$ and $X_2 = 1.25$ and the target output is $Y_7 = 1$ and $Y_8 = 0$. The learning rate is 0.1 and all the nodes are using the Relu activation function.
